

TMD Technologies Conflict Minerals Policy:

TMD Technologies supports the actions of the EICC (Electronic Industry Citizenship Coalition) and GeSI (Global e-Sustainability Initiative), in encouraging companies to undertake reasonable due diligence with their supply chain to assure that metals are not being sourced from mines in the “Conflict Region”, situated in the eastern portion of the Democratic Republic of the Congo (DRC) and surrounding countries.

TMD Technologies has either obtained, or is in process of obtaining, information from our suppliers concerning the origin of the materials supplied to TMD for use in the manufacture of products to meet the requirements of our customers. Based on the information provided by our suppliers, TMD Technologies does not knowingly use metals derived from ‘conflict minerals’ in our products.

TMD Technologies expects its suppliers to be forward looking in establishing policies, due diligence frameworks, and management systems, that are consistent with the relevant guidance for responsible supply chain management, avoiding material sources linked with conflict affected and high-risk areas.
