from TMD Technologies, LLC

**TMD Technologies, LLC reports record business year  
- and now provides enhanced servicing support to meet the needs of  
US military radar, EW and other system upgrades****Sustained growth**

TMD Technologies, LLC (TMD-US) supplier of professional, world class, microwave and RF products based in Baltimore, Maryland has reported a record year of growth and expansion - winning several new microwave-based military programs and large and important orders from established TMD customers. Also, following the recent appointment of Tom Curtin as Vice President, Sales & Business Development, the TMD-US team has again been further strengthened with new key positions to boost its growing customer base and associated technical support operation.

**Increased demand.....**

*Tom Curtin: 'Investment in equipment and human resources.'*

As part of its on-going business development, TMD-US is seeing a substantially increased demand for its travelling wave tube (TWT) based amplifier diagnostics, component level upgrades, and sub-system maintenance. Said Tom Curtin: "As the US military community continues to upgrade its radar and EW platforms to extend system life, so first class, reliable technical product support, maintenance and repair has become imperative. In response to these accelerating and demanding requirements we have now invested in the equipment and human resources necessary to fully support this burgeoning side of our business."

**.....fast turn-around - reduced system downtime!**

High power airborne, ground based and shipboard transmitter systems for radar and EW/ECM/EA applications are cycled through the TMD-US purpose-built facility for evaluation, performance upgrades and, where needed, repairs. The company's fast and efficient turn-around time on these activities provides significant customer benefits - particularly in the form of reduced system downtime.

*Fast and efficient turn-around from TMD-US - on evaluation, upgrade and repair*

Continued Tom Curtin: "Our technical certifications and adherence to all required standards enables our customers to entrust us with the repair of their TMD TWTAs, ruggedized amplifiers and microwave power modules (MPMs) currently in use on active military programs. At TMD-US the growth of our service center is a vital factor in the provision of a higher level of support facilities for our US military and prime contractor customers."

***TMD Technologies – building on more than 30 years as an industry leader of scientific, technical microwave and high-power RF innovation***

**TMD Technologies, LLC (TMD-US)**

TMD Technologies, LLC is the US subsidiary of UK, West London based TMD Technologies Limited. Established in Baltimore, Maryland, TMD-US provides complete technical and commercial support to TMD's US customers and offers a comprehensive product repair center.

The US Sales and Business Development team is fully trained and actively involved in supporting TMD's entire product line-up, including TWTAs, MPMs and HVPSUs along with new business development in the United States.

**TMD Technologies Ltd, UK**

With a heritage dating back to the 1940s, TMD Technologies Limited (TMD) is a world class designer and manufacturer of professional microwave and RF products. At the company headquarters in West London UK, it produces specialised transmitters, amplifiers, microwave power modules (MPMs), high voltage power supplies, microwave tubes and transponders for radar, EW and communications applications. Having twice been a Queen's Award winner, it also produces a range of advanced instrumentation microwave amplifiers for EMC testing, scientific and medical applications. All of TMD's portfolio of high-power microwave products are available to customers in the USA.
